## **Installation Notes**

NOTE: Pump protrusion beyond rim.

Install this product according to the installation guide.

Two separate 240 V electrical services required; one for the pump/control, and another for the heater.

Floor support under whirlpool must provide for a minimum of 2500 lbs. (1134 kg)

Hot water supply should be 70% of capacity or greater. Installations will vary.

If installing a rim mount faucet, make sure there is no interference with drain overflow and circulating system before drilling any holes. Consult local and national codes for minimum air gap requirements if installing a spout on the faucet deck.
